

OSCAR In BC.

A discussion

OSCAR Con 2014

Goals

- Provide my perspective on where we are
- Trigger some discussion on where we want to be
- Have the discussion trickle into the rest of this meeting and beyond

OSCAR BC History

First, there were four
clinics...

... And one health
authority...

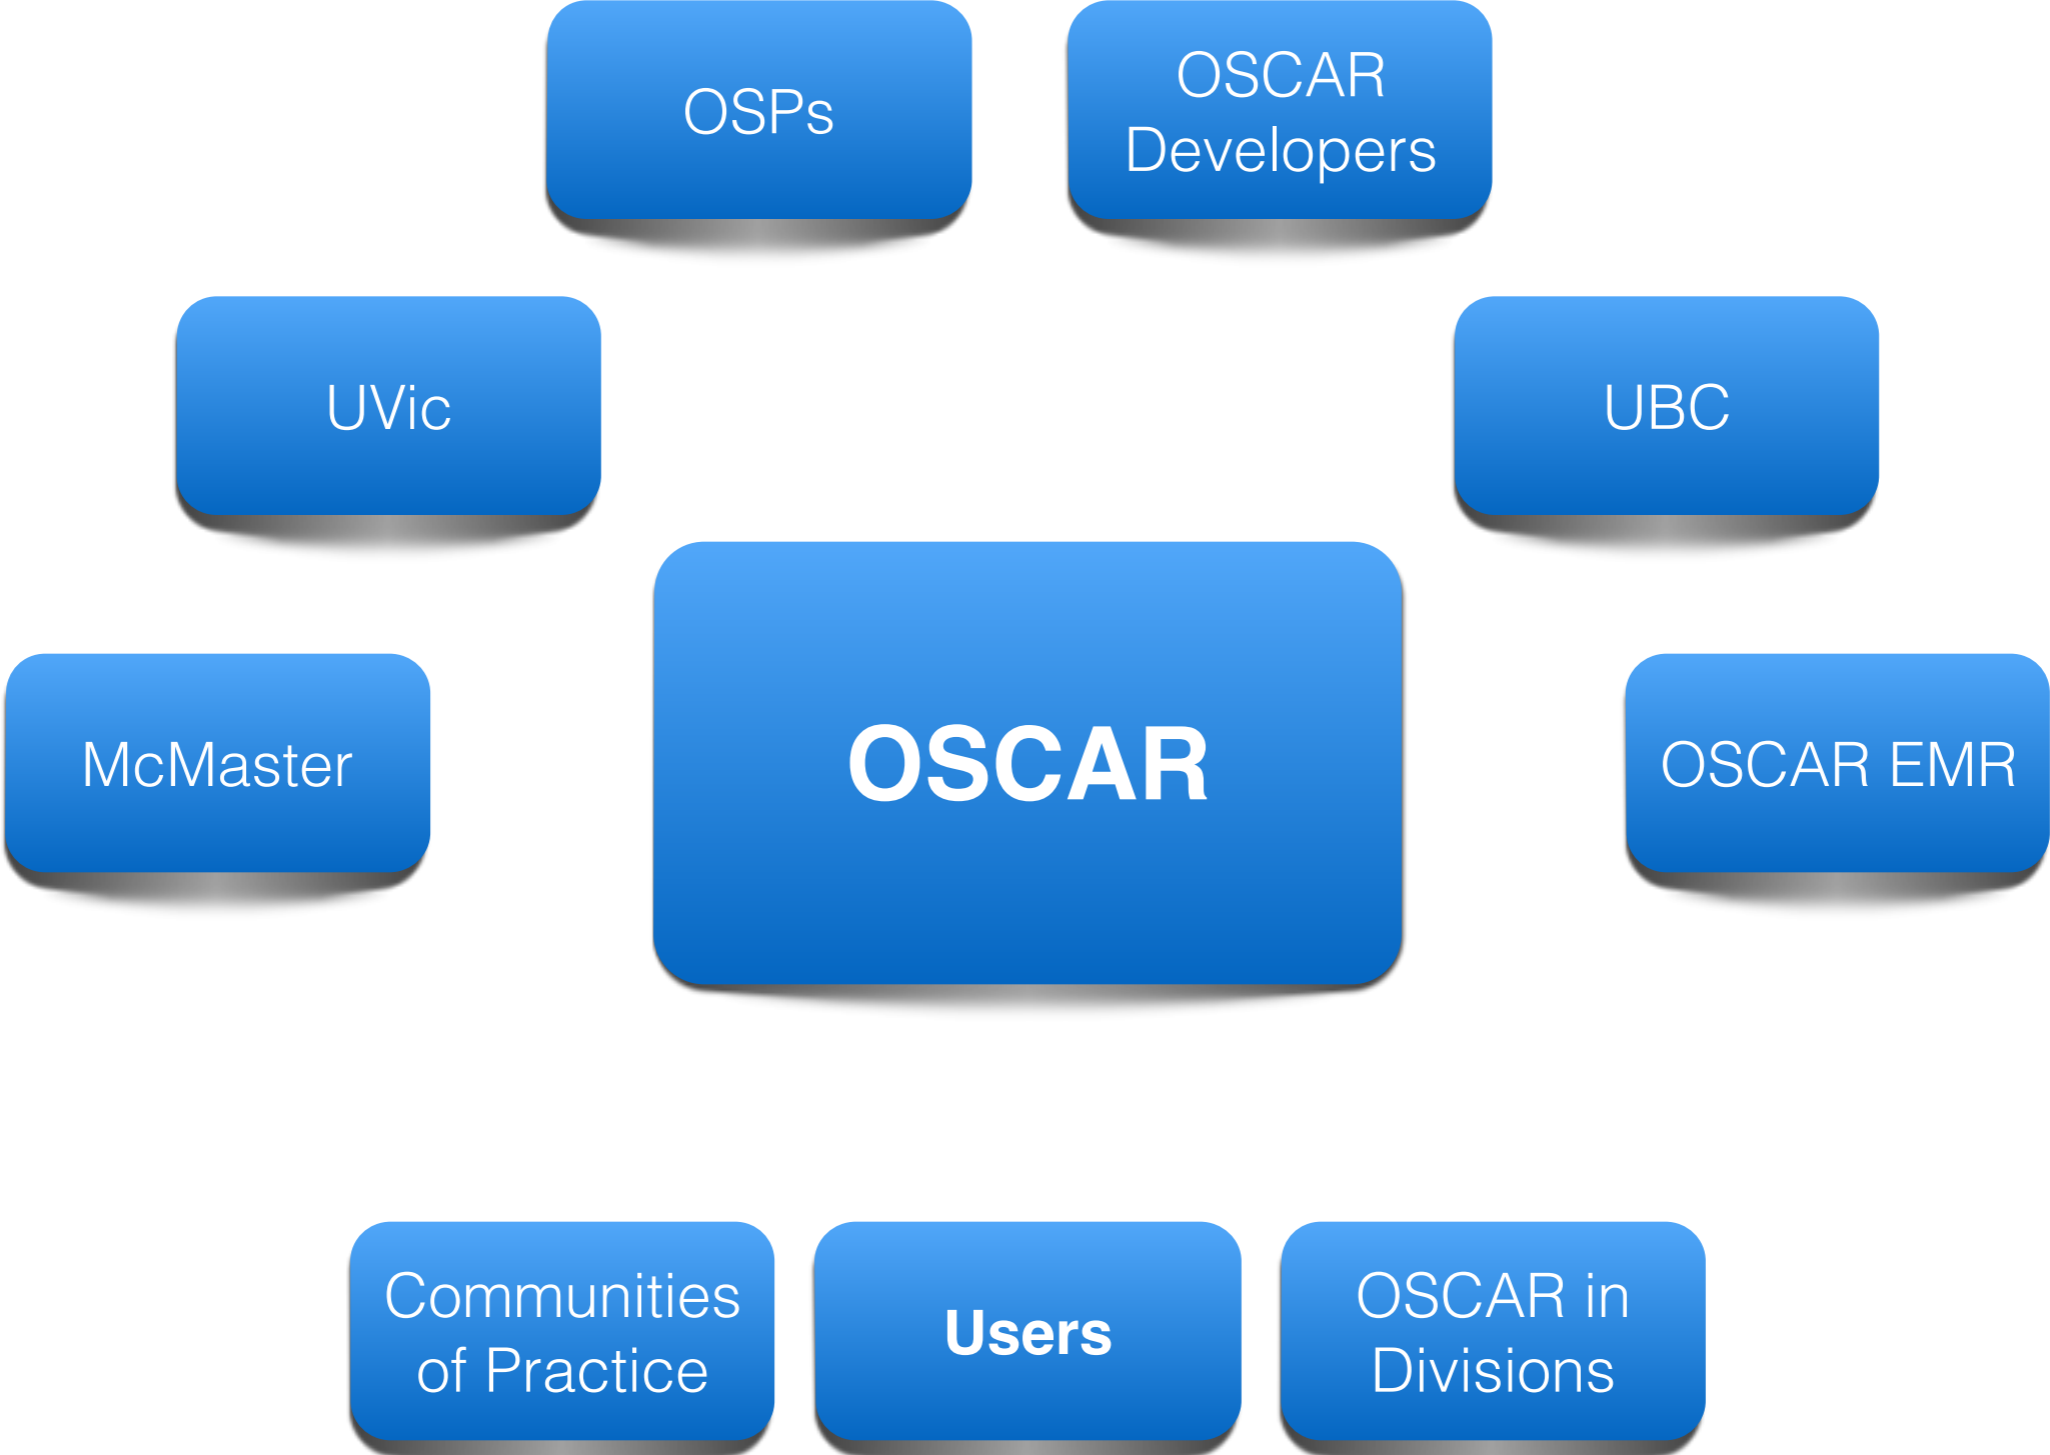

... And David and Jay.

Then
OSCAR grew in BC

OSCAR BC Now

(10 years later)

OSCAR

We are at an interesting
place in OSCAR in BC.

We have a large user
base.

It may be increasing
faster than we expect.

We have the promise of a
lot of improvements with
OSCAR 14.

Need to be ready for
the changes coming.

Our Challenge

OSCAR is growing

A real risk that our OSCAR
freedom can cause
unnecessary fragmentation.

OSCAR BC has a need to
maintain current
conformance.

There will be new
conformance
requirements in BC.

OSCAR

Meaningful Use

ePrescribing and PLIS

“Interoperability and
approved ASP.”

We need to grow within
our “ecosystem”.

**There is an exciting
path ahead**

We have an improved
OSCAR coming.

We have active mailing
lists and meetings.

We are coordinating
our BC community.

WOSPA is a year old.

OSCAR 14 BC

Working Group:

OSPs, LEAD Lab, OSCAR EMR

We are collaborating
more now than before.

Starting to have a
collective voice at some of
the appropriate BC tables.

We have increasing capacity for development, review, and testing in BC.

We are a unique
group.

We engage with OSCAR
to do good work.

We are driven by
quality.

We are driven by our
community.

**Questions for us to
think about.**

Where does the OSCAR
EMR Community need to
focus?

What is our internal
focus?

What is our external
focus?

What do we want to
be?

How can we get
there?
